Noninvasive Cardiac Imaging

University Medicine Berlin, Humboldt -University Charité Campus Buch

Experimental Clinical Research Center, a joint institution between Charité and MDC

HELIOS Clinics Berlin Buch, Department Cardiology and Nephrology

J. Schulz-Menger is a cardiologist by training and active in Cardiovascular Magnetic Resonance (CMR) since 1996. She has a significant interest in non-ischemic heart disease , including cardiomyopathies and noninvasive hemodynamics. Her interest is research as well as translating the results into clinical practice. Her group is running a high-throughput CMR-center based on dedicated scanner for CMR only - driven by cardiologists. She has a board certification in internal medicine, in cardiology followed by board certification dedicated on CMR.

Since 2004 she is heading the Working Group CMR at Charité Campus Buch. Furthermore, she established the department Non-Invasive Cardiac Imaging in the clinical environment in Helios. For research reasons she established a research outpatient department in cardiology at the Charité.

She owns a University-Professorship in Cardiology “Noninvasive Imaging focused on CMR”.

The research of the group is focused on clinical topics like myocardial tissue differentiation and hemodynamics including growing interests in MR-physics. That is based on collaboration with MR scientists world wide. A special interest is research at experimental 7Tesla CMR in human.

She has a high interest in CMR-teaching and education. She was one of the founders and is the scientific director of the University CMR Courses in Berlin. Her group was able to establish a CMR-network throughout Germany. The group has published more than 200 peer reviewed articles.

She is an elected member of the faculty council of the Charite and its spokesperson.

Dr. Schulz-Menger served on the Board of International Society for Magnetic Resonance in Medicine (ISMRM) and is a past-president of the Society for Cardiovascular Magnetic Resonance (SCMR).

She is board member of the European Association of Cardiovascular Imaging (EACVI) of the European Society of Cardiology (ESC).

She was the chair of the WG CMR of German Society of Cardiology and was able to found a Taskforce dedicated to CMR education as well as to initiate societal paper.

Jeanette Schulz-Menger is originally from Berlin and has an 25y old son. He is a medical doctor as well. She loves theatre, reading books, skiing – and CMR.
